REFERENCE: PBTs – P4C5Z-027

This letter is in response to your request of Flint Hills Resources to provide you with information as it relates to the polypropylene resin: P4C5Z-027.

P4C5Z-027 is not intentionally formulated with any of the following compounds:

- Decabromodiphenyl ether (DecaBDE)
- Phenol, isopropylated phosphate (3:1) (PIP (3:1))
- 2,4,6-Tris(tert-butyl)phenol (2,4,6-TTBP)
- Hexachlorobutadiene (HCBd)
- Pentachlorothiophenol (PCTP)

Flint Hills Resources does not test each raw material or product we produce for trace amounts of these compounds.

As with any material, evaluation under end-use conditions is essential. Ultimately, customers must make their own determination that use of this product is safe, lawful, and technically suitable for their intended applications. If you have any other questions please contact me at (903) 239-5332 or blair.colby@fhr.com.

Regards,

Blair Colby
