Product Information: ***PFAS Statement in Elastollan 1185A10X US,***

In the manufacture of the above-mentioned product line per- and polyfluoroalkyl substances (PFAS) as defined in the Annex XV restriction proposal published on 22 March 2023 (Annex XV Restriction Report – see link below) are not used as raw materials. To the best of our knowledge, based on available information provided by our raw material suppliers plus knowledge of our finished product composition, the product line listed above does not intentionally contain PFAS.

As PFAS substances cannot reasonably be expected to be present, these products have not been tested for these chemical compounds.

For notice: Many substances can be found everywhere. Checking for the presence of these substances is not part of our ongoing production control.

This statement refers to the active portfolio. It does not cover color concentrates which have 'CONC' in the trade name or experimental grades which have 'EXPERIMENTAL' or 'EXP' in the trade name.

Please be aware that our products should be considered as large volume industrial products and may contain traces of unknown impurities (coming from the raw materials used or from the manufacturing process itself).
