February 13, 2025

Dear James Wagner,

This letter is in response to your request for an update of the BSE/TSE (Bovine Spongiform Encephalopathy/Transmissible Spongiform Encephalopathy) status of the subject products.

We are happy to inform you that our products are not manufactured using animal-derived materials. We do not intentionally use animal-derived materials and our raw material suppliers have confirmed that they do not add animal-derived materials. In addition, our products do not come into contact with equipment which may contact any animal-derived materials.

Therefore, we can also confirm that our products comply with the requirements of the "Note for Guidance on minimizing the risk of transmitting animal spongiform encephalopathy agents via human and veterinary medicinal products - EMEA/410/01 rev.3", and USFDA regulations at 9 CFR 94.18 - 94.20.

The introduction of any material of animal origin into our facilities shall be notified to our customers.

Feel free to call me at 909-606-8252 if you have any questions about this matter.

Sincerely,

Lance Roettele
