

Roettele Industries, Inc.

**MCCP Presence Statement
Roettele Industries Viton Discs**

December 10, 2025

Dear James Wagner,

Roettele Industries, Inc. hereby confirms that the Viton material used in the manufacture of our product D1500, Viton Disc .437 and D1600, Viton Disc .500 FDA **does not contain Medium-Chain Chlorinated Paraffins (MCCP)** or chlorinated paraffin compounds as intentional additives, raw materials, or processing aids.

This declaration is based on supplier formulations, material specifications, and technical compliance documentation confirming that MCCP substances are not part of the supplied Viton compound used for production.

Additionally, Roettele Industries confirms that:

- MCCP are not intentionally added anywhere in the manufacturing process
- MCCP are not used as carriers, plasticizers, or surface treatments
- No MCCP are knowingly introduced during fabrication, converting, or storage

Roettele Industries remains committed to environmental compliance, transparency, and material stewardship across all supplied goods.

Sincerely,

Lance Roettele
